Skills

- **Languages**: Python, JavaScript, SQL
- **Frameworks**: Django, FastAPI, Scikit-Learn, Pandas, Numpy, Matplotlib, HTML and CSS, Bootstrap
- **Tools/Platforms** MySQL, SQLite, Git, GitHub, Docker, PyCharm, Visual Studio Code, Jupyter Notebook, Postman
- **Soft Skills**: Public Speaker, Problem-Solving, Team Player, Adaptability

Internship

- **CISSA – Centre for Innovation in Science and Social Action** May 24 – Jun 24
  SDE Intern
  - **About**:Developed and enhanced the user interface and overall user experience of CISSA's website using React, PHP, and JavaScript. Improved layout consistency, visual design, and responsiveness across devices.
  - Optimized frontend components for responsiveness and cross-browser compatibility, addressing rendering issues and improving accessibility and usability across different screen sizes and multiple devices.

Projects

- **CampusKart - Used Books & Study Materials Marketplace API** | GitHub Jan 26 – Feb 26
  - Designed and developed a RESTful backend using FastAPI for a student-focused marketplace enabling buying and selling of used books, study materials, and academic hardware, with PostgreSQL as the relational database.
  - Implemented secure authentication using JWT and bcrypt password hashing, and built role-based access control for admin and users to protect sensitive routes and ensure secure data access.
  - Built a scalable listing and order management system using SQLAlchemy ORM, designing optimized relational schemas and handling entity relationships between users, listings, and orders.
  - Integrated Celery with Redis for asynchronous background processing, including order confirmation notifications and post-order tasks,
  - Improved API responsiveness by offloading time-consuming operations from the request-response cycle.

- **Maintenance Pro - Predictive Fleet Maintenance System** | GitHub Jan 24 – Apr 24
  - Fleet maintenance Prediction model based on Machine Learning and AI.
  - Developed a prediction model using vehicle usage, sensor, and historical maintenance records to forecast Potential failures and optimize maintenance schedules, ensuring operational efficiency, cost-effectiveness, and enhanced vehicle safety.
  - Reduced vehicle downtime from **30%** to **10%**
  - Built a Streamlit-based web app for real-time predictive maintenance insights and to easily customize for real-world fleet data.
  - Containerized the entire application using Docker and Docker Compose and configured environment-based deployment, enabling reliable multi-service orchestration and production-ready scalability.

Certificates

- Android App developer Pro by LPU Summer training. | Certificate Jun 24
- Cloud Computing by NPTEL | Certificate Apr 24
- Unraveling Python towards AI/ML – Live MOOC(Python) by CSE PathShala. | Certificate Feb 23
- Complete Web development Bootcamp: Udemy. | Certificate Jan 23

Achievements

- **Model Maters expo 7th rank** March 2025
  Achieved 7th position in AI/ML Model master's Expo 25 competition among 40 team participants.
- **LPU's inter domain science exhibition**: March 2025

  Selected to exhibit Machine Learning model among various presenters at interschool level.

Education

- **Lovely Professional University** Punjab, India
  Bachelor of Technology - Computer Science and Engineering; ***CGPA: 7.66*** *August 2023 - Present*
- **Sarawathi Vidyanikethan Senior Secondary School** Ernakulam, Kerala
  Intermediate; ***Percentage:67%*** *June 2020 - March 2022*
- **Jawahar Public School** Varkala, Kerala
  Matriculation; ***Percentage:89%*** *April 2016 - March 2018*
